Kindle are completely free to download and enjoy. You'll find not only classic works that are now out of copyright, but also new books from authors who have chosen to give away digital editions. There are a few paid-for books though, and there's no way to separate the two

Airbus Iae Engine

The IAE V2500 is a two-shaft high-bypass turbofan engine which powers the Airbus A320 family, the McDonnell Douglas MD-90, and the Embraer KC-390. The engine's name is a combination of the Roman numeral V, symbolizing the five original members of the International Aero Engines consortium, which was formed in 1983 to produce the V2500 engine. The 2500 represents the 25,000 lbf (111 kN) produced by the original engine model, the V2500-A1 variant.

IAE offers 22,000 to 33,000 lbs thrust for the Airbus A319, A320 and A321 Family of Aircraft. The V2500 engine is the preferred engine for A321 ceo operators. A321 with Sharklets powered by V2533-A5 is illustrated above.

International Aero Engines - IAE V2500

The IAE V2500SF SuperFan was a design study for a high-bypass geared turbofan derived from the IAE V2500. It was offered as the primary engine option for the Airbus A340 in January 1987. Although several customers signed preliminary contracts for this variant, the International Aero Engines board decided in April 1987 to stop the development of the SuperFan, which forced Airbus to partly re-design the A340.
