Aligning the Trust Services Criteria with COSO 2013 was a logical way to apply internal controls at an entity as a whole because of the widely used and accepted internal control framework. The five components and 17 principles of COSO are made part of the common criteria under the Trust Services Criteria for all SOC 2 reports.

### COSO Principles: How They Align with Trust Services Criteria

entries/stays earlier than 22 April 2013 (= 18.10.13 minus six months). The calculator does not support calculation of entries/stays earlier than 22 April 2013. The "old" definition applies for such entries/stays ("3 months in 6 months from the date of first entry)." The calculator has two functionalities.

Cyberwarfare is the use of digital attacks against an enemy state, causing comparable harm to actual warfare and/or disrupting the vital computer systems. There is significant debate among experts regarding the definition of cyberwarfare, and even if such a thing exists. One view is that the term "cyberwarfare" is a misnomer, since no offensive cyber actions to date could be described as war.

### Cyberwarfare - Wikipedia

Cyberwarfare is the use of computer technology to disrupt the activities of a state or organization, especially the deliberate attacking of information systems for strategic or military purposes. As a major developed economy, the United States is highly dependent on the Internet and therefore greatly exposed to cyber attacks. At the same time, the United States has substantial capabilities in ...
