Dictionary Ecology Evolution Systematics Oxford

Lampriformes / ˈlæm p r i f ɔːr m iː z / is an order of ray-finned fish. Members are collectively called lamprids (which is more properly used for the Lampridae) or lampriforms, and unite such open-ocean and partially deep-sea Teleostei as the crestfishes, oarfish, opahs, and ribbonfishes. A synonym for this order is Allotriognathi, while an often-seen, but apparently incorrect ...

Lampriformes - Wikipedia

Ecology (from Ancient Greek οἶκος (oikos) 'house', and -λογία (-logia) 'study of') is the study of the relationships between living organisms, including humans, and their physical environment. Ecology considers organisms at the individual, population, community, ecosystem, and biosphere level. Ecology overlaps with the closely related sciences of biogeography, evolutionary biology ...
