Arachnoid granulations (also arachnoid villi, and pacchionian granulations or bodies) are small protrusions of the arachnoid mater (the thin second layer covering the brain) into the outer membrane of the dura mater (the thick outer layer). They protrude into the dural venous sinuses of the brain, and allow cerebrospinal fluid (CSF) to exit the subarachnoid space and enter the blood stream.

Neuromuscular junction (Synapsis neuromuscularis) At its simplest, the neuromuscular junction is a type of synapse where neuronal signals from the brain or spinal cord interact with skeletal muscle fibers, causing them to contract.. The activation of many muscle fibers together causes muscles to contract, which in turn can produce movement.

The lymphatic system is a circulatory system made up of lymph vessels, which are much like blood vessels. It drains extra fluid (called lymph) that has passed out of the blood and into tissues and returns it back to the blood. The lymphatic system also includes tissues and organs that make, store and release lymphocytes (a type of white blood cell).

The immune system defends the body against infection and disease. Some parts of the immune system look for unhealthy cells or something foreign to the body, some send messages to other cells in the body about an attack and others work to attack and destroy micro-organisms that cause infections - like bacteria, viruses, fungi, parasites - or unhealthy cells, like cancer cells.
