The Java Algorithms online test assesses candidates' algorithmic-thinking skills and their ability to implement algorithms using Java. It's an ideal test for pre-employment screening. A good developer will be able to design and implement algorithms that are both correct and efficient.

### Java Algorithms Online Test | TestDome

While some of our implementations are as fast as their counterparts in java.util, our primary goal is to express the core algorithmic idea in an elegant and efficient manner. While we embrace some advanced Java features (such as generics and iterators), we avoid others that would interfere with the exposition (such as inheritance and concurrency).
