The Kawasaki KX500 has a single cylinder, two-stroke gas engine, with a displacement of 499 cc (30.45 cubic inches). The version released in 1987 possesses a compression ratio of 8.5-to-1 (with later models having a ratio of 7.4-to-1), utilizes a capacitor discharge ignition (CDI) system, and a reed valve configuration system.

KX500 Engine Specifications | It Still Runs
Ransom's first hurdle was in finding a KX500 engine. Kawasaki ceased production of the bike after 2004. What made his quest even more difficult was the fact that most racers had shied away from Open-class bikes as racing organizations slowly phased out Open displacement classes. Fortunately, W. Robert found a diamond in the rough.
