One of the reasons HCA convinces people is that you can read about the final weeks of someone's life with COVID and it's horrific. You don't see much in the media about the specifics of the disease, generally just saying that someone was in ICU for a few weeks before death, but HCA puts up the social media posts of family, and you get details about strokes, paralysis, organs going septic ...

In this essay John Loftus defends Hitchens' razor: "What can be asserted without evidence can also be dismissed without evidence." Christopher Hitchens' point was that miracle claims without any evidence should be dismissed without a further thought. Bayes' theorem requires the existence of some credible evidence/data before it can be correctly used in evaluating miracle claims. So to be ...

The death registration data from the ONS (the Office of National Statistics) shows that out of about 37 million people under the age of 50 there were 3,729 deaths with covid listed somewhere on the death certificate - so this is an inflated figure of covid death. That's 0.01% of the population in this group.
